

Environmental sustainability

3.1 Claudelands Commitment

Claudelands is committed to environmental sustainability.

This is reflected in the design of the venue as well as daily operational practices of all staff and contractors.

Sustainable Design

Claudelands was designed to meet an equivalent 4.5 Green Star Rating.

Some of the sustainable design features include:

- Installation of high efficiency air conditioning systems
- Energy efficient lighting and lighting control systems
- Installation of the latest LED street and pedestrian lighting
- The use of rainwater for toilet flushing

3.2 How can you help?

There are a range of things that exhibitors can do to help us minimise waste, energy and water consumption while exhibiting at Claudelands.

- Purchase environmentally responsible products
- Limit the amount of packaging you bring on site to only recyclables (paper, card, plastic)
- Take away any non-recyclable items with you
- Ensure exhibitors turn off their stand lights at the end of each day
- Switch off and unplug any electronic equipment not required overnight
- Leave any cardboard beside your exhibition stand for Claudelands to recycle
- Encourage sustainable transportation options for delegates and event goers
- Go paperless option for handouts, for example use memory sticks instead
